

Live ordering.
Seamless travel.

Hotelcloud empowers guests with real-time ordering of any services offered by hotels and those of approved local activity partners. We provide a one-of-a-kind online platform that helps hoteliers increase sales and easily generate revenue through pre-negotiated partnerships with local attractions and businesses.

Guests can seamlessly book hotel services such as housekeeping, spa treatments, room service, and browse and order local activities via the platform, from the moment they book their stay. These activities are all partners of Hotelcloud, approved and recommended by the hotel.

Hotelcloud is accessible from any device, smartphone, tablet, or laptop, including a guest's personal device. We accomplish all of this without the need for complicated or expensive servers and hardware. All the heavy lifting is done in the cloud!
